LGS4: Market Place

This is the collective name we have applied to three connected areas of mown grassland bounded by Kings Street, Front Lane and Back Lane: Timber Green (LGS4A), Stocks Green (LGS4B) and Maypole Green (LGS4C). Trafalgar Green (LGS4D) is a small triangular grassy verge at the junction of Church Street and Back Lane. As part of the Sturminster Marshall Conservation Area these greens are bordered by some of the oldest buildings in the village.

These greens have a number of specimen oak and horse chestnut trees. Among these mature trees are those planted to commemorate the centenary of the Battle of Trafalgar (on Trafalgar Green), Queen Victoria's Diamond Jubilee (Maypole Green) and King Edward VII's coronation (Stocks Green). Timber Green, as the name implies was formerly used for storing timber. Close by Stocks Green is Johnnies Ditch, a location where drovers used to take stock to drink from the river: the site has been recognised as of special value within the conservation area by Sturminster Marshall Parish Council.

Meeting the criteria

The greens are areas of permanent grassland with a number of broadleaf plant species in the heart of the old village and, because they are bounded by roads, are readily accessible.

The setting within the conservation area and the presence of mature trees mean that Maypole Green and Stocks Green/Timber Green have a high visual amenity value. A differential mowing regime, leaving some areas uncut, means that more species are able to flower and a greater range of vegetation heights provides suitable conditions for a greater diversity of invertebrates.

These areas all have obvious historic and cultural values as they relate to historic use and custom. The emblematic maypole on Maypole Green is still used for annual maypole dancing by pupils of the village First School.

The scenic value and the historical connections qualify these sites for inclusion as Local Green Spaces. They are already registered as Common Land.

Characterisation

These greens fall within the MG6 (*Lolium perenne-Cynosurus cristatus*) community of the National Vegetation Classification. It is a common community of circum-neutral, damp, fairly fertile soils in lowland England.

Maypole Green, Stocks Green and Timber Green are treated as a single unit in this characterisation.

Stocks Green & Timber Green

Maypole Green

Trafalgar Green

LGS5: The Old Railway Line

This site is part of the old trackbed of the former Somerset & Dorset Railway line and provides a connection between Newton Road and Railway Drive. Currently it is an isolated section of the North Dorset Trailway. It is hoped that in the future connections can be made with sections leading northwards to Spetisbury and south-eastwards to Corfe Mullen. The site consists of a footpath, verge and hedgerows providing habitat for a range of common species.

Meeting the criteria

The site is within the village envelope and readily accessible from both ends.

From its elevated position it does give views across the fields of Springfield Farm and out towards Newton Peveril.

Its cultural and historic significance lies in the fact that it is part of the former railway system.

It is not of especially high wildlife value, though the combination of trees, shrubs and verge vegetation does make a useful contribution to the overall biodiversity of the parish.

The site is well-used by walkers and dog walkers.

The combination of features above make this location suitable for designation as a Local Green Space.

Characterisation

A wide, bare earth path on the top of an embankment.

The embankment carries a variety of trees and shrubs, mainly Sycamore (*Acer pseudoplatanus*), Hawthorn (*Crataegus monogyna*) and Field Maple (*Acer campestre*) with smaller numbers of Ash (*Fraxinus excelsior*), Wytch Elm (*Ulmus glabra*), Rowan (*Sorbus aucuparia*) and Cherry Plum (*Prunus cerasifera*). Also present is a patch of Cypress (*Cupressus* sp.).

Much of the area below the tree cover is relatively bare, with patchy distribution of a number of species which are locally dominant:

Hedera helix Ivy

Urtica dioica Stinging Nettle
Arum maculatum Cuckoo-pint
Ranunculus ficaria Lesser Celandine
Veronica hederifolia Ivy-leaved Speedwell

Dactylis glomerata Cock's-foot Arrhenatherum elatius False Oat-grass

Rubus fruticosus agg. Bramble
Geum urbanum Wood Avens

Other species include:

Heracleum sphondylium Hogweed Bellis perennis Daisy

Allium triquetrum Three-sided Leek
Anthriscus sylvestris Cow Parsley

Ranunculus repens Creeping Buttercup

Rumex crispusCurled DockRumex sanguineusWood DockPrimula vulgarisPrimrose

Lamium album White Deadnettle

Poa pratensis Meadow-grass

Poa annua Annual Meadow-grass
Poa trivialis Rough Meadow-grass

Brachypodium sylvaticum False Brome Pentaglottis sempervirens Alkanet

Veronica agrestis Green Field Speedwell

Vicia sativa Common Vetch
Festuca pratensis Meadow Fescue
Holcus lanatus Yorkshire Fog
Anisantha sterilis Barren Brome

Some garden escape species are also present such as Spanish bluebell and cultivated varieties of Primula and yellow archangel.

At the northern end of the railway line, where a slope has replaced the former steps, early successional plants are found on the exposed chalk fill of the embankment. These include:

Leucanthemum vulgareOxeye DaisyLonicera periclymenumHoneysuckleRubus fruticosus agg.Bramble

Chamerion angustifolium Rosebay Willow-herb

Old Railway Line

Northern End of Old Railway Line

LGS6: Walnut Tree Field

The site is within the Sturminster Marshall Conservation Area with views across the Stour valley and adjacent to St Mary's Church and the churchyard. The field is a listed Ancient Monument of archaeological value, containing the buried remains of a medieval village field system.

Walnut Tree Field was, in the past, referred to as "The Orchard," An old apple tree provides a clue to its former designation whilst the presence of an old walnut tree (*Juglans regia*) is the defining feature of the field and is held to be of significant local value. A number of younger apple trees have been planted in the field in recent years.

This is a location for quiet recreational activity with access to the River Stour. High value to the community as a much-used space for dog walking throughout the year and in the warmer months it is used for bathing in the river and for some water sports. It is also valued for its wildlife and tranquility. The combination of grassland, the river and its marginal vegetation provides a measure of diversity for wildlife and the management objectives of the Dorset Countryside Team are to maximise this value by appropriate mowing regimes.

Meeting the criteria

The field is adjacent to the older part of the village, designated as a conservation area, and close by the Market Place greens. Thus it is readily accessible.

The scenic value of the site is partly determined by its proximity to St Mary's Church but mainly a result of its location at the side of the River Stour, with additional views across to

the fields on the further bank and more the distant higher ground towards the Badbury Rings road.

The historic context is recognised by its listing as a Registered Ancient Monument.

The wildlife value of the site is based on the combination of grassland, river and riverside communities. The objectives of management are to enhance this value further by a mowing regime that leaves areas with taller vegetation.

It is an area for quiet recreation, though some river-based activities do also take place on a limited scale. It is also seen as an important area for people to interact with, and learn about, wildlife.

The historic, wildlife and recreational importance of the Walnut Tree Field make it highly suitable for designation as a Local Green Space.

Characterisation

Walnut Tree Field is an area of MG1 (*Arrhenatherum elatius* grassland), using the National Vegetation Classification. Current management consists of mowing well-defined pathways between blocks of taller vegetation, left unmown to encourage a wider diversity of invertebrates which, in turn should encourage a wider diversity of vertebrates.

Within the field the grassland community is locally dominated by different species, giving a mosaic of habitats.

Indicative species list

Arrhenatherum elatius False Oat-grass Cock's-foot Dactylis glomerata Alopecurus pratensis Meadow Foxtail Lolium perenne Rye-grass Poa pratensis Meadow-grass Holcus lanatus Yorkshire Fog Red Fescue Festuca rubra Festuca arundinacea Tall Fescue Stinging Nettle Urtica dioica Cow Parsley Anthriscus sylvestris

Appendix 1. Responses from Household Questionnaire

Answers to Question 36 Valued green spaces

Churchill Close	133
Walnut Tree Field	99
Charborough Green	70
Maypole Green	51
Barton's Ground	47
Stocks Green/Timber Green	33
Footpaths/bridleways	14
Golf Course and paths round it	12
Fields around village (possibly some double counting with footpaths)	11
Old railway line	10
Riverside	9
Moor Lane	6
Millmoor	3
Arch Ground	2
Mapperton fields	1
Lamplands	1
All green spaces	64
None	4
Nil return to this question	51
Other comments ref value of open spaces with no specifics	5

Of those saying that none were valuable, 2 were from Jubilee Cross and 2 from the main village

Of the nil returns, 3 were from Henbury, 3 from Mapperton/Almer and 8 from Jubilee Cross. The remaining 37 were from the main village.

Of those 70 valuing Charborough Green, and mentioning it specifically, 30 were from post codes in the immediate vicinity. Of the remaining respondents, 11 replied "both of the above." This may have been because these were the only two valued or because the respondents did not realise that these were examples, rather than specific references. The question asked which green spaces, (eg Churchill Close and Charborough Green) were valued.
